Chandelier 41475-12 "Cologne"

The Hoffmann Family

This archetype of the Jugendstil chandelier was designed by Josef Hoffmann for the Werkbund Exhibition in Cologne 1914 and is regarded one of the milestones in Austrian design of the early 20th century. Therefore the prototype is still on display in Vienna's Museum of Applied Arts.

The chandelier is made of brass with a nickel finish. The crystal beads are made from hand cut lead free beads in contrast to wonderful large stones in the main rim. This alternates with a cast floral décor.

This smaller version is suitable for a wider area than the monumental original chandelier of this series.

Design: Josef Hoffmann, 1914; Jugendstil

Dia.: 57 cm, H.: 106 cm; Weight: 30 kg

Material: Brass, lead-free crystal; Finish: Nickel

Lights: 12 x E27; Max. Wattage: 720 W
