Table lamp 5694-3

The Haerdtl Family

Just as other of Oswald Haerdtl's designs this small table lamp bears the typical organic features. The simple brass frame is decorated by a vine which twines around the central column. This is lovingly decorated with crystal parts resembling leaves and blossoms. These elements are a true challenge for our master craftsmen.

A striking little detail is the tulles for the candles. These are elaborately constructed of folded sheet brass, contradicting the otherwise floral appearance.
